BellaDati Roadmap for 2020– 2022

Roadmap for 2020 - 2022 – Main strategic directions

BellaDati IoT and Advanced Analytics Platform

Specific Complete IoT solutions (replicable solutions or key customers)

Robotics and drones (complementary to Platform)

- *IoT Suite*

  - expand protocols to connect with

  - expansion of functionalities for usage on high volume of gates

  - expand transformations,rules and actions

- ***Expand the portfolio of readymade modules/Extensions for web applications, iOS and Android that are used to build solutions more efficiently for key customers.***

- *Machine Learning Suite* will implement the packageing function to allow the building applications without front-end programming

- *Agile BI Suite* will build functions on key customers requests

- *Videoanalytics Suite*

- Perform implementation and operate solutions for key partners and customers using Belladati platform.

- Leader in shrimps farm monitoring, Phase 2:

  - Controlling pedals

  - Develop fully unsupervised algorithm for shrimp desease identification in early stage

- The complete solution for the predictive maintenance for industry 4.0 based on vibrations sensors.

- Further develop telematics solution, smart lighting solution and parking solution

- Drones for warehouses POC

- Intelligent Control system for robotics - POC
