# BellaDati Agile BI
Business Application for Aerospace & Automotive

Executive Summary

Aerospace and automotive companies face increasing challenges and therefore it is key for them to collaborate efficiently with value chain partners to shorten the time to market and reduce risk and cost during product development cycles. Drive after-market services and whole of life revenue and expand into new markets. Gain real time visibility across the extended manufacturing value chain to drive operational efficiencies and identify opportunities for growth.
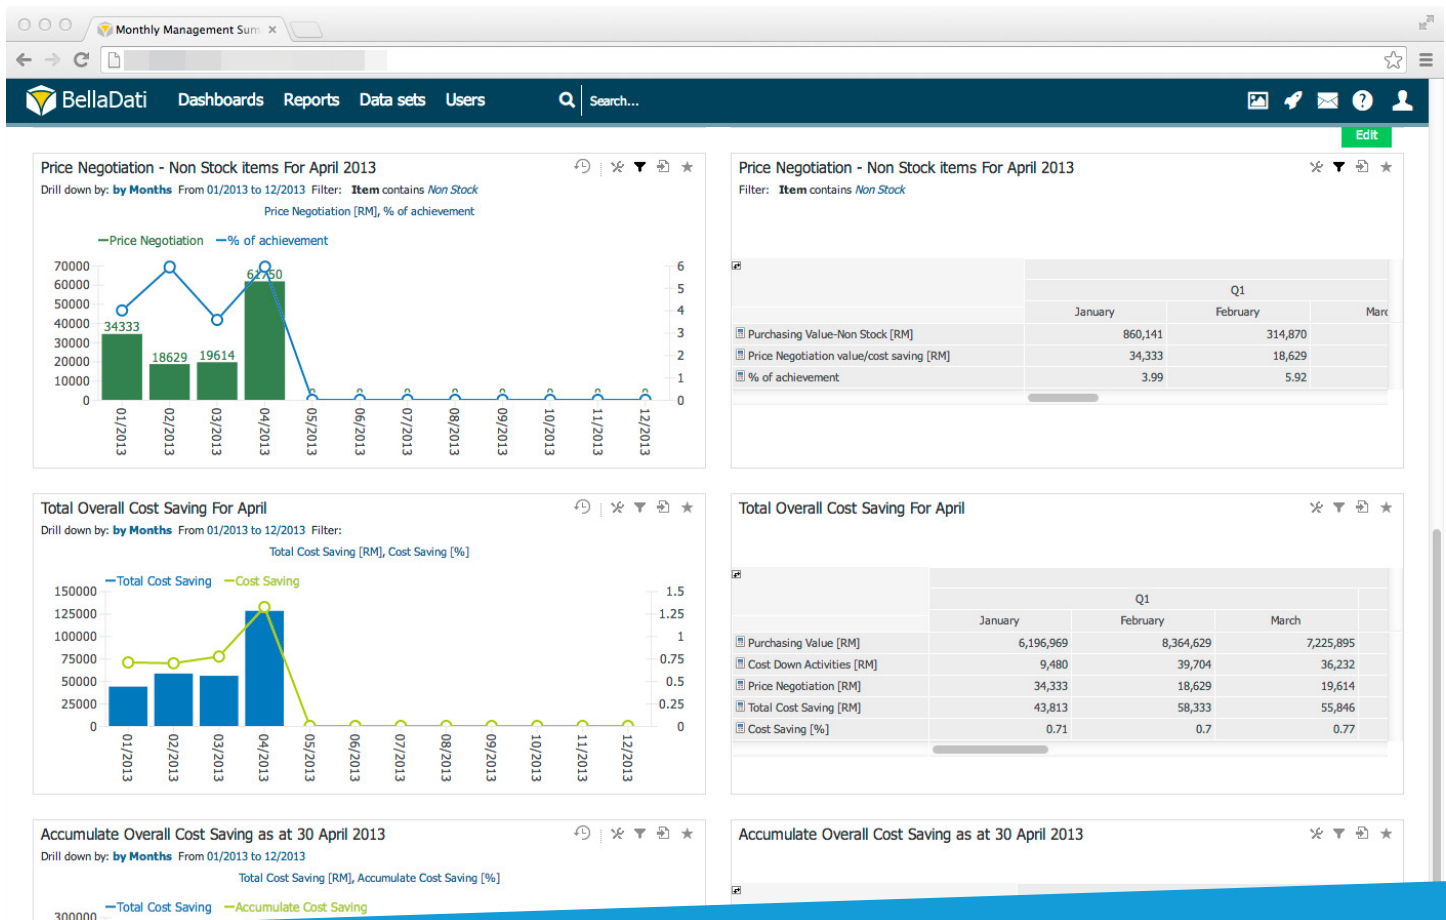

Reduce Costs, Increase Revenue Streams

Aerospace & Automotive companies operate in highly regulated environments. Products are often complex with long and costly development cycles, often requiring support over many years. The supply chains operated are some of the most advanced in manufacturing. There is often fierce competition and overcapacity and the industry has become more globalized and consolidated. Product development costs and risks are significant so the focus is on building supplier partnerships that reduce risk and continually take cost out of the supply chain. The focus on highly strategic and profitable maintenance, repair & overhaul continues. The focus on the analysis and forecasting of customer satisfaction is the key element in the highly competitive environment.

Using the Belladati Agile BI
Business Application for Aerospace & Automotive companies will:

- Drive sourcing and procurement efficiencies

- Support demand pull methodologies to reduce Waste and drive Quality

- Synchronize operational processes using real-time production insights

- Lock in future revenue streams by bundling value-added services with products, typically at the time of initial sales

- Improve enterprise governance of risk, safety and regulatory compliance

- Improve collaboration with partners and suppliers by providing visibility and data insights across the entire value chain

- Manage product life cycles and innovation processes for optimal ROI

- Ease administrative and IT burdens associated with data analysis and reporting across business functions

- Perform sentiment analysis using Social media

- Analyze and perform Predictive Churn Modeling

Complement your existing BI investments with BellaDati or use BellaDati as stand-alone Agile BI

Aerospace & Automotive companies need insight on sales performance and operational efficiency to manage complex sales and partner channels and protect profitability. BellaDati removes the barriers to working with real-time information through in-memory, associative technology that enables entire workforces to make timely, accurate decisions.

BellaDati Agile BI delivers true self-service BI that empowers business users by driving innovative decision-making.

BellaDati is Agile BI, Pure Web Application, Complete BI Solution for Aerospace & Automotive

Cloud or On-Premise
Deploy in the cloud or install On-Premise. All you need is web-browser or mobile device.

Analytics Platform
with API and SDK for creating Embeded Data Solutions. Deliver BellaDati as Your Brand.

Mobile BI
Pull reports out of your pocket on- or off-line with BellaDati Mobile for iOS and Android. Filter, share and comment or harvest new data on the go.

Aerospace & Automotive Apps
Take the fastest paths. Leverage pre-built Telco dashboards, reports and measures to cut down costs and time.

BIG Data and Predictions
In Memory Real time Statistics and Prediction with SAP HANA.
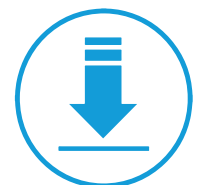

NO-SQL/SQL biz data integration and analysis
from more than 100 databases, APIs, Cloud Solutions and Social Networks.

Social network for Data Discovery
Realtime collaboration on the insights. Search, share, copy, export, get notified on data changes.
