BellaDati deployment:
OnPremise

Business situation

Statler is an online platform for creating, maintaining and sharing hotel budgets, forecasts and financial reports. Statler is using BellaDati to create a hotel controlling platform which is tailor-made for processes in hotel industry. By using mainly Open Source platforms, they have made it possible to offer this easy to configure and to use solution at a low price, which is a fraction of the price of classical financial budgeting solutions.

Solution

Various types of financial and controlling reports are available for the users, with the option to see data both on individual hotel level and/or consolidated up to chain level:

- Balance Sheets
- Working Capital
- Financial Highlights
- Statement of Financial Position
- Cash Flow
- Income Statement
- Hotel occupancy
- Forecasts
- And many more.
