

# Administration

This section describes the basic BellaDati administration which can be performed via application GUI by an user with necessary [permissions and roles](#).

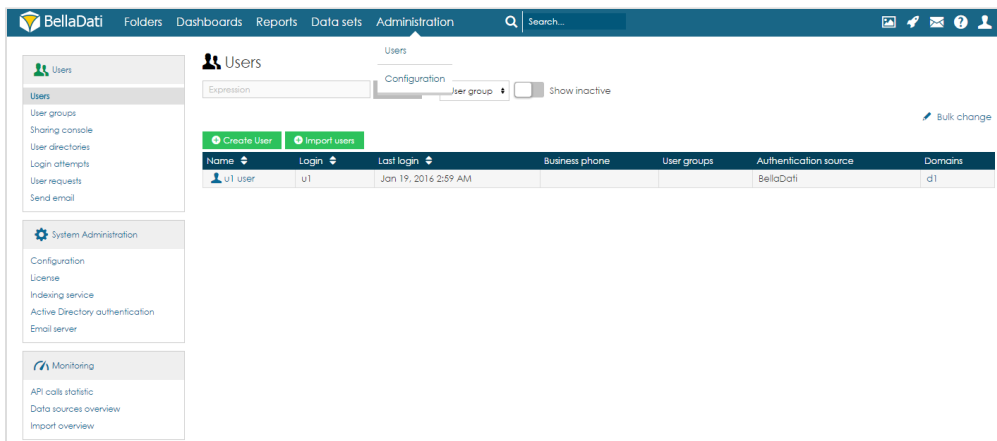

If you are looking for detailed guide for system administration, visit the [Developer network](#) instead.

The following chapters are covered here:

- [Managing Configuration](#)
- [Administering Users](#)
- [Administering Domains](#)
- [Sharing console](#)
- [Usage Monitoring](#)
- [Mass mailing](#)
- [License](#)
- [Export schedules overview](#)
- [Extensions](#)
- [Supported languages](#)
- [Upcoming imports](#)
- [Import nodes](#)
- [System Overview](#)
- [Database summary](#)

You must have the Domain Administrator role to administer your domain.
