

Displaying numerical value as date or time duration

In some cases, it might be useful to display numerical value as date or time duration.

This format can be set in the indicator settings.

Following syntax can be used:

- *duration(pattern)* - takes the input number as seconds
- *durationM(pattern)* or *durationMinutes(pattern)* - takes the input number as minutes
- *durationH(pattern)* or *durationHours(pattern)* - takes the input number as hours
- *durationD(pattern)* or *durationDays(pattern)* - takes the input number as days

Pattern:

Letter	Date or time component	Example
H	Hour in day	0
m	Minute in hour	30
s	Second in minute	55
D	Day in year	123

Examples:

Format	Example
durationH(HH:mm:ss)	18:34:54
durationH(dd:HH)	00:21
durationD(d 'days' HH 'hours' mm 'minutes' ss 'seconds')	2 days 12 hours 25 minutes 33 seconds
