

BellaDati 2.8.2

RELEASE NOTES BELLADATI 2.8.2

Release date: September 24, 2016

NEW FEATURES

- REST API - Get Image from Media Gallery
- REST API - Add optional templateId to import JSON method
- ML Studio - Add support for scheduling pipeline executions
- ML Studio - Add support for automated pipeline executions on data change

IMPROVEMENTS

- ML studio - code builder improvements
- ML studio - add better errors handling and errors messages
- ML Studio - Add projects and pipelines searching

BUG FIXES

- Extensions, Multi-domain mode - allow super admin to import extension to particular domain
- Report - Row level filter (empty & not empty) will lock the view
- REST API - time imported via REST API is not stored correctly
