

BellaDati 2.9.13.4

RELEASE NOTES BELLADATI 2.9.13.4

Release date: November 20, 2019

NEW FEATURES

- Administration - Add settings to enable/disable cross joins
- REST API, OAuth - Support ActiveDirectory based login as part of username

BUG FIXES

- Report, Bar chart colors - When there is drill-down on the Y-axis, wrong colors are applied in the chart
- Data Set, Import - No data can be imported after more than 2 billion records are imported to the data set

Apps

- [IoT Console 1.4.1](#)
